CYBER THREATS ARE EVOLVING

RAPIDLY WITH AI

Attackers can now generate highly realistic phishing messages, deepfake videos, and voice scams within minutes.

This makes detection more difficult than ever.

KEY RISKS:

- AI-generated phishing messages that look legitimate
- Deepfake voice/video impersonation of kith & kin
- Faster and more targeted social engineering attacks

HOW TO AVOID/ STAY SAFE ?

- **Verify before you trust:**
Always confirm unusual requests (especially financial) via a secondary channel
- **Check message authenticity:**
Look closely at sender names and suspicious links

Translating Dreams into Reality

- Avoid sharing sensitive data on AI tools or unknown platforms
- Be cautious of urgency: Attackers often create pressure to bypass judgment
- Report suspicious activity immediately

REMEMBER:

If something feels
unusual,
pause and verify.
